Director Biltz Is Not Going dom was in Bridgeport this afternoon

Alderman Benjamin Fletcher having arrived home Alderman Hartley, chairman of the street committee has called a meeting of the committee for Monday night for the purpose of settling the dispute over the kind of wood block that shall be laid in Main street.

The director of public works and the railroad company have become fearful of a dangerous accident in Main street which is full of holes, and rather than wait for the action of the street committee a gang of men went to work this morning mending holes in the asphalt pavement between Golden Hill street and East Washington avenue 6 and 8 inches deep. Director Biltz to-day said: "I saw the auto chemical engine go up Main street yesterday and my heart almost stopped bearing when they hit those holes. It is not when they hit those holes. It is not safe to wait any longer. I could have loose stone placed in the holes, but they would not stay. The men are using cement with the stones and the repairs will make it safe to drive through the street. The railroad company is also going ahead with its repairs."

Alderman Benjamin Fletcher fresh from a fortnight's outing at Atlantic City said this afternoon that he had a talk with the mayor in ord 2 to earn what he could about the couds learn what he could about the condi-tions surrounding the letting of the contract. He declared that on general principles he believed that contracts should go to the lowest bidder, all conditions being equal. MINE WORKERS ISSUE STATEMENT

(Special from United Press.)
Philadelphia, April 10.—To patch up a truce between factions in their ranks, the miners' executive committee resumed its session at the Hotel Hanover soon after breakfast this morning. President Lewis issued a statement as follows:

"It is to be regretted that the operators' and miners' representatives were unable to reach an agreement in this city this week. The representatives of the miners' organization, acting with authority of the Scranton convention of the anthracite mine workers decided to meet the operators in a spirit of conciliation and friend-ship.
